

**HOME SWEET HOME**  
**IMPROVE YOUR LIFESTYLE WITH PROPANE**

**INSIDE OR OUTSIDE, YOU CAN TRUST PROPANE TO SAFELY POWER EVERYTHING THAT TURNS A HOUSE INTO A HOME.**

**PROPANE FOR YOUR HOME . . . BETTER THAN ELECTRIC *benefits* . . .**

**RELIABILITY**

**Keep the lights on!** When your neighbors are experiencing outages, you can rest easy. Propane doesn't rely on the grid to keep your home powered because you're using your own personal energy supply.

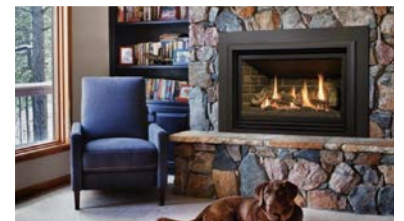

**TRANSPARENCY**

**Do you ever wonder how your power bill gets so high month to month?** With propane, you can track your usage in your own backyard. You'll always know how much you've used and how much you have left.

**VERSATILITY**

**Propane really can do it all!** From powering your appliances to keeping your lights on during an outage there's no job too big for propane. All done while saving you money.

**PRIMARY ENERGY SOURCE**

**Propane is used "as is" with the need for further production to be useful.** This is important because electricity uses a much bigger carbon footprint than propane, which heads straight to your door.

**THE CLEANER ENERGY**

**Most people don't realize how clean propane is!** Propane has the lowest carbon content of any fossil fuel. Compared to electricity, which is ultimately powered by coal or nuclear power propane is a much cleaner energy source.
